

**IRHR Workshop at CIRC**

Community Information Resource Center

# **Kapashera**

**“Internet Rights  
Human Rights”**

**26<sup>th</sup> August, 2015**

**CIRC Kapashera.....!**

# IRHR

**Objective** — As we have already had this training with the motive to encourage our community people towards digital literacy. Continuously we again had this training with the motive of same. But in this training we invited some professional personalities who is able to lead the community. In order to have this training successful our volunteers also joined this training so that they can facilitate these trainings for others. But the motive of this was bit different that we had earlier that this training was especially for the people who can lead the community and who are working with the community as a leader.

**DEF Team introducing the Session of IRHR**

**Participants Participation -** People from the community came in the workshop that was integrated group of the Community including volunteers, coordinators and other staff from some another organization. Who joined our workshop and nurtured the social debate and asked some very important and logical questions from the facilitators that helped everyone to get into the debate and helped others to understand the topic.

**Volunteers in the Workshop -** This training was bit different because some volunteers also participated in the workshop and had debate and question on very important social issues apart from discussing only on internet. And after having this workshop we're hoping with them that they

will be able to lead these training later on.

**Newness in the training-** There were bit of positive reformation in workshop like

- This workshop defines lot of practical response from the community. Because in this training we had very few theoretical content and encouraged people with the help of practical conversation.
- We also had some very interesting activates with the participants that helped them to understand “what is internet rights & Human Rights?”
- Apart from community people also joined us who were from various organizations, who been indulged in many activities in society for years.

**A Very Practical Session on Women Rights..!**

- Some students who always been busy in rock songs and raps also joined this workshop and asked some very important questions towards their right and education. It can be biggest achievement of the workshop if they start having information for their rights and effort to solve all that.

## Participation of Migrant Girls in IRHR workshop at CIRC KPS

**Advantage of the Workshop** – As been mentioned since starting that workshop was beyond expectation. And again people had been encouraged towards Digital Literacy who has ability to pass all these knowledge to the community. Through the workshop people learned about Internet Right & Human Rights and how all that can be used online. They also discussed a lot on human rights advantage and dis-advantage of Internet. So ultimately it was one of successful interactive session towards Digital Literacy.

Entertainment Session for the DEF Team

**Feedback & Further planning** – Feedback of the Participants in the workshop was very much positive. Lot of participant in the training participated very enthusiastically and pressured others to give their own opinion. As they mentioned in personal conversation with we all us that they learned so many things about internet from this workshop and if they are not able to access they will surely encourage others to come & access for their rights.

Next we are planning to design some another training for some more people from the community, hope we'll find chance to have this workshop with any other organization who works on the same or different. Through this we'll be able to make people feel our existence in the community.

Thank You All for being With us.....!

Thank You..!
